

## Claims

What is claimed is:

- 1    1. A clutch lockout comprising:
  - 2        posts to receive bolts to retain the lockout to a clutch boss;
  - 3        retaining screw holes to retain lockout fingers mounted on the lockout; and
  - 4        at least one indent in each post to accommodate the retaining screw
  - 5                holes.
- 1    2. The lockout of claim 1, further comprising:
  - 2        slots to receive the lockout fingers; and
  - 3        at least one edge formed to create lips around the slots, the lips having a
  - 4                width narrower than the diameter of countersinks of the retaining
  - 5                screw holes.
- 1    3. The lockout of claim 2, further comprising:
  - 2        the at least one edge formed to create lips having a width narrower than
  - 3                the diameter of the retaining screw holes.
- 1    4. The lockout of claim 1, further comprising:
  - 2        slots to receive pivots of the lockout fingers; and
  - 3        two retaining screw holes for each slot to receive a pivot.
- 1    5. The lockout of claim 4, further comprising:
  - 2        countersinks of the retaining screw holes overlapping the slots to receive
  - 3                pivots.

- 1 6. The lockout of claim 2, further comprising:
- 2 two edges forming lips with portions having different widths.
